About Trillium Dental PC

The Doctors and Staff at Trillium Dental have worked together as a team for many years. Understanding the value of an experienced team for achieving goals more efficiently and effectively than could be done on an individual basis, our team uses a coaching model to help our clients achieve their oral health goals. Education is the key to achieving oral health goals. The Doctors and staff realize that we are with our clients one-on-one for relatively short time periods during the course of a year, so we must provide you with tools and techniques which empower you to succeed at maintaining ideal oral health between visits. Trillium Dental's philosophy is to attack dental problems with tried and true methods, combined with innovation. The Drs. Vuilleumot invented a unique restorative teeth bonding process and were granted a U.S. patent for their innovation, in 2007. In 2010 they were granted Trademark rights for their process, now known as SmileBond Systems. The Doctors and staff believe that innovative solutions will be essential for solving the complex oral health challenges facing us in the future.
